

GardenMats®

“Garden Mats® eliminate 90% of your weeding and yield 10% - 20% more vegetables. We weeded less than 2 hours all summer!” Peter Comart, President

Anya and her favorite, yellow Swiss chard.

June 5th, 12th

Special prices on factory seconds and slightly blemished mats.

“I currently have three raised beds. Last year I left one bed uncovered, covered the second bed with another product and used Garden Mats® on the third. I fought with weeds all growing season with the uncovered bed and had a substandard crop. The second bed was covered with a well-known product but it was totally ineffective. Weeds grew under the cover raising the cover off the ground 5-6 inches. This was more of a nightmare than the uncovered bed. The third bed was covered with Garden Mats® and proved almost maintenance free. It had no weeds growing under it and produced an abundant crop. In the fall I simply brushed it off and rolled it up for storage. Next season I will cover all three beds with Garden Mats®.” Ray McCormack, Washington, Vermont

“The results were great. I estimate that the yield was increased by 10-20% and I was able to grow a longer season fruit. I always recommend that people mulch. This type of groundcover produces the same results and is especially valuable if you have weed issues. I prefer the reusability and the permeability of Garden Mats® over the other ag products.” Kevin Thompson, Commercial Organic Grower, Highland Garden, Worcester, Vermont
