June 3rd, 10th Garden Tours 10 a.m. – 4 p.m.

"The results were great. I estimate that the yield was increased by 10-20% and I was able to grow a longer season fruit. I always recommend that people mulch. This type of groundcover produces the same results and is especially valuable if you have weed issues. I prefer the reusability and the permeability of Garden Mats® over the other ag products." Kevin Thompson, Commercial Organic Grower, Highland Gardens, Worcester, Vermont
